Response to Amendment

1. The amendment filed on December 12, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-27 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Prior art fails to teach or make obvious the presently claimed invention. Hoffman et al. (US 5,799,057 A1) teach a detector for an x-ray computer tomograph (Abstract) comprising a plurality of detector modules (Figure 4, item 20; col. 5, line 10), a heating apparatus (Figure 4, item 102A; col. 5, lines 64-65) located on the rear face of the detector modules, and detector mounting adjusters (Figure 4, item 106A; col. 5, line 66). Hoffman et al. do not describe a pressure-contact apparatus including the heating element. A detector with a pressure-contact apparatus including a heating element represents an improvement over prior art as the pressure-contact apparatus ensures a uniform temperature across the detector modules and thus provides a means for creating more accurate calibration tables.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
